## MILK REPLACERS.

You want your kids off to the best start possible, and a good milk replacer helps to maintain consistency in the diet and promote healthy kids. We offer 3 quality milk replacers for kids:

1. KidGro made by Grober Animal Nutrition
2. Serval made by Caprival
3. Wet Nurse made by Prairie Micro-Tech Inc.

## MINERALS.

Sunderland Co-op carries a complete line of specific goat minerals made by a top-of-the-line manufacturer. Our palatable minerals are high quality and highly fortified to meet the demands of different farms and feeding situations. Ingredients are bio-available to allow for excellent effectiveness and absorption into the blood stream. Custom blending of mineral in small lots is also available.

### 1. Total Goat Pellet

Our 17% protein total goat pellet is a unique fixed formula containing high levels of fibre and energy. Our highly sophisticated formula offers an extremely palatable diet from all vegetable sources. This complete pellet, when fed with 1<sup>st</sup> cut hay or straw, has proven itself in 0.5-0.9L/doe increases in milk production. This ration is a very economical route to consider especially when forage quality or supply may become an issue. Also great for producers wanting to increase or maintain body condition.

### 2. Textured Goat Rations

Textured goat rations are made locally at our mill in Sunderland. Using a wide variety of feed ingredients, these rations can be tailored to meet the needs of individual farms. Our 17% protein textured feed is floor stocked and available for you. This formula is proven very effective on area farms, made with molasses and soy oil to give it excellent palatability and goat acceptance.

### 3. Doe Developer

Our doe developer is a very-high fibre feed with excellent growth and herd health results for growing and developing kids. Doelings fed our doe developer will be a great contribution to your milking string, showing great condition and strength and able to withstand the demands of production. Again an all vegetable fixed formula feed, offering a top vitamin and mineral package, and can be medicated and customized to suit your herd.

### 4. Kid Starter

Why not offer the absolute best start for your baby kids? Get them eating as quickly as possible with our 20% protein palatable formula, available in crumbles or a textured feed made at the Sunderland mill. This feed contains milk products and is all vegetable, and of course sticking to the strong ethics of our Sunderland Co-operative nutrition staff, these formulas are fixed as well. Our Kid Starter generally contains a coccidiostat as per customer specifications and is made with a great line-up of early rumen available proteins and energy sources to meet the early digestion needs of kids. Lots of success with this starter and lots of lucky kids eating it!
