

Maximum Price Contracting

Is this a program that fits the needs of you or your business?

- Are you concerned about the potential of increasing fuel costs?
- Would it benefit you to know your fuel prices would not exceed a set price for 6 months?
- Would it benefit you to know that if fuel prices dropped in that time period, you would receive the benefit of the lower pricing?
- Would knowing your fuel costs for the next 6 months assist you in budgeting for your business?

If you answered yes to any of the above questions, it may be time for you to call the Sunderland Co-operative at (705) 324-2242 or toll free 1-800-567-2667 to find out more about Maximum Price Contracts.

Answers to Common Questions about Maximum Price Contracts.

What is it?

A program designed to enable you to purchase a contract to establish a ceiling on your fuel prices for up to 6 months.

How does it work?

On the day you sign your Maximum Price contract, your maximum price will be established at 4 cents above your current fuel price. For example, if your price today for clear diesel is \$0.909/litre, your maximum price would be set at \$0.949/litre for the term of your contract.

When does the contract expire?

The duration of the contract is 6 months or until you purchase the total of the litres you've booked in your maximum price contract, whichever occurs first.

What if the market price for fuel drops during the term of my contract?

If fuel prices drop during the term of your contract, you will pay the lower price for your fuel. The Maximum Price Contract protects you against rising fuel prices, while offering the benefit of paying a lower price if market prices decrease.

What products can I book?

You can book dyed diesel, clear diesel or furnace oil on a Maximum Price Contract.

What does it cost to buy a contract?

The cost to purchase a contract is 3 cents per litre for the number of litres you choose to book. For example, if you choose to book 10,000 litres, your cost to purchase the contract would be $10,000 \times \$0.03 = \$300 + \text{GST}$.

Sunderland Co-operative reserves the right to limit quantities booked.

You will be required to sign a contract to book the fuel.
